They eventually got bored and starved them selves.

sleeping

Sleeping was rough as there were no beds to lie down on. The conditions poor hygiene in trenches lead to head lice what could possibly eat them alive until they discovered using a hot iron on their clothes it was also infested with rats the size of cats that would eat their food and the dead bodies lying around.

What is trench mouth?

- Trench mouth is when poor hygiene leads the gums in your mouth to rot away and becoming diseased.

Holidays!

- One Christmas the allies all played football that was only to happen once as the commanding officers didn't approve of this.
